RESEARCH EXPERIENCE

Jun 2020 – present **Interactive Graphics Lab, National Taiwan University**
Visiting student, advised by Bing-Yu Chen and Tom Yeh (Visiting scholar).

- Designing and conducting a study to identify accessibility challenges of laser-cut assembly. Implementing a Fusion 360 plug-in to generate tactile aids for input laser-cut model. Conducting an evaluation for tactile aids, and leading video and qualitative analysis [C.6].
- Collecting brain signal data using fNIRs on VR tasks, and analyzing data by MATLAB.

Feb 2019 – Aug 2019 ***Research Assistant, advised by Bing-Yu Chen and Da-Yuan Huang.***
Using Unity to implement six tablet applications for [C.2], and an authoring tool for designer to specify haptic feedback on a tablet [C.1].

- Integrating arduino and electronics, and implementing two VR applications. Designing a study to get preliminary feedback of using TanGo[C.4].

Sep 2019 – Sep 2020 **XDiscovery Lab, Dartmouth College**
Graduate student, advised by Xing-Dong Yang.

- Designing and conducting a study to identify accessibility challenges of circuit prototyping, and an evaluation for AccessibleCircuits [C.5], where I designed 3D-printed adaptions for existing circuit components via Fusion 360, which were integrated with a capacitive screen-based interface (we used Android smartphone) to enable touch interaction.
- Collecting and labeling 500+ images of breadboard circuits, and implementing a computer vision-based system using APIs (e.g., Mask-RCNN and OpenCV), and web interfaces (e.g., socket.io, MongoDB) on both student and teacher ends for remote learning.

Sep 2018 – Apr 2019 **Mobile and Ubiquitous Interaction Lab, National Yang Ming Chiao Tung University**
Research Assistant, advised by Yung-Ju (Stanley) Chang.

- Design and execute an experiment using methods, such as WoZ, speed dating, user enactment and contexual inquiry, to understand user-smart agent communication [C.3].
